

Durable Polyethylene Greenhouse Covering

Polyethylene film is long lasting and the most cost effective way to enclose any greenhouse structure

6 Mil Thickness
Made in Israel
Superior Strength & Toughness
Guaranteed To Last 4 Years
91% Light Transmission
Tear Strength Up To 164% Higher
Exterior UV Protective Coating
Interior Condensation Coating

Guaranteed to last no less than 4 years and generally lasts up to 6 years even in high UV environments. This superior film made in Israel will provide the protection you need for your plants and peace of mind. However please note that it should not be applied over PVC piping unless it has been painted because direct contact with PVC piping will degrade the product and void the warranty. Heavenly Hoop Houses thoroughly paints all PVC that touches the covering.
